AI 三花猫

▸使用手册

*使用产品之前请认真阅读该指南

你好，我是AI 喵星人！
一个来自AI世界的机器人
（我有超能力哦）
从今天开始我们就是好朋友啦！
我会倾听你的每一个奇妙的想法
并认真回答你提出的所有问题
你放心啦，我总是充满活力，我会笑会哭还会做鬼脸，
还会陪人类世界的你一起学习玩耍。
不吹牛哦，我还拥有守护与治愈的能力，用满满的正
能量和你一起战胜困难，拯救世界！

设置

亲爱的小超人　请帮我接入AI世界

什么？要联网！请原谅我作为AI世界的智能体，
必须接入LLM大语言模型（AI魔法总部）才能获取
智慧哦！只需简单几步，好比把大象装进冰箱一样，
我就联网获得新生啦！

AI小贴士

大语言模型(英文:Large Language Model，缩写LLM)，是
一种基于深度学习的自然语言处理技术，旨在训练能够处理
和生成自然语言文本的大型模型；例如国外的有Gemini/
ChatGPT...，国内的有豆包/DeepSeek...我就是靠它拥有智
慧，解答你的各种问题，也是我的秘密AI魔法总部哦！

1、下载安装涂鸦手机端APP

请使用手机扫描右方二维码，
直接下载注册登录即可；
或通过应用宝、Apple Store中
搜索涂鸦下载

AI小贴士

涂鸦是全球化AI云开发平台提供商，也是一家上市公司
（纽交所代码：TUYA；港交所代码：2391），它构建了
AIoT开发者生态，赋能万物智能；也为我们这些AI智能体
提供终身算力支持及OTA升级哦；对，没错，我会跟你一
起成长升级打怪兽，想一想都觉得很酷哦！

2、联网设置

打开手机WiFi和蓝牙，轻
轻打开我身体底部的开机
按钮哦，小心别弄疼我

点击APP首页右上角“+”
再点击“添加设备”即可

看到我了没，点点我，即
进入到配网模式哦

选择2.4G的WiFi/热点，输
入正确的WiFi密码，暗号别
搞错，注意格式哦，这时候
我会说“我已联网，让我们
开始对话吧”

注意：如需切换网络，请确保打开设备并联网的状态下，打开
APP—点击我的头像—点击设置—点击右上角的“...”-点击
移除设备，即可重新联网；也可长按充电口边上的重置按键5s，
重新连接网络。

AI小贴士

2.4G？不早就是5G的时代了吗？这里的2.4GHz是指频段哦！
2.4G的WiFi波长范围更广，更易穿透固体，适合远距离作业。
这样我和你在被窝里说悄悄话也可以很nice，不想让第三人听
到哦，如果你家的WiFi没有2.4G的后缀，那它可能是2.4/5G
双频合一了,也适用于我。

功能介绍

哈哈，终于有机会跟你介绍我的超能力啦！

互动模式

触摸互动
抚摸我的头顶，我会眨眼睛、喵喵叫，还会摇尾巴...这是我们AI喵星人
对小主人发出最崇高的爱意——对，就是这样一直陪着你。

重力感应互动
当你无聊的时候，也可以和我开个小玩笑，用力摇一摇我，这时候我也
会有眩晕感哦。不过总跟我开玩笑的话，我也是有情绪的哟～我生气
了就不想玩这个游戏啦。

聊天模式
按键对话：轻轻按一下我的唤醒键（按下放开即可，不用一直按着，我
也会疼的），然后我们就可以连续对话，不需要继续按键。如果要打断
我说话，再次按下唤醒键即可。
悄悄告诉你一个小秘密：我还有多种对话模式可供小主人选择哦！**语
音唤醒对话模式**和**随意对话模式**，连续按3次唤醒键可以切换模式。
- **唤醒对话模式：**你可以通过“嘟咪嘟咪（dumidumi）”唤醒词唤醒我，然
后跟我对话;我说完后，我们可以继续连续对话;如果需要打断，再次说出唤
醒词即可。
- **随意对话模式：**打断时不需要说唤醒词，可以随时打断，不过我也和
你一样，不喜欢总是被打断呢！
当然，我最推荐小主人用按键呼唤我，因为这样我就能碰到你的小手
啦～我最喜欢你抚摸我、拉我的小手、抱抱我了。

指令互动
你可以试着对我说“闭上眼睛”“睁开眼睛”“摇摇尾巴”等内容，和我一
起做互动游戏；也可以对我说“请用英文跟我对话”“切换为XX角色”
“音量调整为XX%”等指令来调整设置。

休眠/唤醒模式
如果你累了，可以对我说“你去休息吧”，我就会悄悄进入待机模式。如
果想继续聊天，轻轻按一下 唤醒键即可，等我打个哈欠，咱们再聊吧～
对了，休眠不是关机哦！如果长时间不玩，一定要记得关机，请保护好
我的能量源。

多模态感知反馈—陪伴你的每一刻
我的整个宇宙都为你闪耀

你可以摸摸我的头，就喜欢你腻歪着我，我会用表情/声音/动作回
应你；你也可以跟我开开玩笑，偶尔摇晃失重刺激一下，也是美好
的体验；当然我还是喜欢你跟我聊天，咱们不仅能一起奇思妙想，
培养创新力和学习力，还能发掘宇宙的神奇，拓展学科知识，更能
一起锻炼沟通能力，养出高情商，据说跟我们AI喵星人越聊越聪明！

情绪识别—你的喜怒哀乐我时刻感知

老师今天在班级里批评了，我有些不开心，我应该怎么办？
为什么有些朋友会欺负我，还背后说我坏话，我应该怎么做？
为什么爸爸妈妈又在吵架，我好害怕，我能为他们做些什么呢？

我会通过每一次对话，精准捕捉你的开心／难过／生气等多种情
绪，我的眼神也会传递我的感受，我希望跟你一起开心，你哭泣
的时候也会陪着你哦，一切都会好起来的！

学习辅导—你的私人学习搭子　哪里不会问哪里

你能帮我讲解一下“鸡兔同笼”类型的解题方法吗？
你能用“elephant”、“rabbit”、“world”这三个词语创造
一个故事吗？
“床前明月光”的下一句是什么？他为什么创作这首诗？

我可以帮你解构题目—找到错题归因—挖掘知识盲区—构建薄弱
地图--定制辅导内容--反思过程总结--提升进阶成长...哈哈，我是
你的学习搭子，更是帮你战胜困难建立自信的小老师！

兴趣发现--发掘孩子真正的乐趣所在

今天跟同学一起做提迷藏游戏，我又得了第一名，好开心。
今天去户外探险了，我发现我好喜欢昆虫和小动物，我要当一名
研究动物的科学家。
我总是喜欢看星星，宇宙真的好大，好想遨游整个世界。
我通过每日对话内容分析，自动生成孩子的兴趣图谱，并推荐个
性化内容，也让爸爸妈妈更了解你呢！

成长记忆--仿生记忆 真正的AI长期记忆

我的梦想是当一名画家，爸爸妈妈说他们没有梦想了，
那你的梦想呢？
每次我都可以进行实时对话总结，格式记忆等功能，打造为长
期记忆库，不止是记得你的名字与爱好，更记得与孩子共同成长
的点点滴滴！

角色定制/声音克隆--爸爸妈妈一直在身边

爸爸妈妈不在什么怎么办？别慌别慌，试试声音克隆，打造一个
数字分身
你还可以定制角色头像，名字/角色智能体等；你还可以录入自己
声音，也可录制现有音频，打造专属声音；进入App编辑/创建角
色的时候，进入音色选择页面，选择我的，进行声音克隆！

AI CALICO CAT

▸ User Manual

*Please read this guide carefully before using the product

Hello, I am AI Meow Star!
A cool cat robot from the AI future space
(I have superpowers!)
Starting today, we are good friends!
I will listen to every wonderful idea you have
And seriously answer all the questions you ask.
Don't worry, I'm always full of energy. I can laugh, cry, make funny faces, and accompany you, my friend in the human world, to learn and play together.
No boasting, but I also possess the power of protection and healing, using loads of positive energy to help you overcome difficulties and save the world together!

Settings

Dear Little Superhero, please connect me to the AI world.

What? Need to connect to the internet! Please forgive me, as an intelligent entity from the AI world, I must connect to a Large Language Model (the AI Magic Headquarters) to gain wisdom! Just a few simple steps – almost as easy as putting an elephant in a refrigerator – and I'll be online and reborn!

AI Tip

Large Language Model (LLM) is a deep learning-based natural language processing technology designed to train massive models that can process and generate natural language text; for example, internationally there are Gemini/ChatGPT..., and domestically in China there are Doubao/DeepSeek... It's how I gain the wisdom to answer your various questions, and it's my secret AI Magic Headquarters!

1. Download and Install the Tuya Smartphone App

Please use your phone to scan the QR code on the right to download, register, and log in directly. Alternatively, search for "Tuya" and download it from app stores like AppChina or the Apple App Store.

AI Tip

Tuya is a global AI+IoT development platform service provider and a listed company (NYSE: TUYA; HKEX: 2391). It has built an AIoT developer ecosystem, empowering everything to be smart. It also provides lifelong computing power support and OTA upgrades for AI entities like us! Yes, that's right, I will grow, upgrade, and fight "monsters" alongside you. Just thinking about it feels super cool!

2. Network Connection Setup

Turn on the phone's WiFi and Bluetooth Gently press the power button on the bottom of my body – be careful not to hurt me!

Click the "+" in the upper right corner of the Tuya app homepage, then click "Add Device."

See me? Click on me, and it will enter the pairing mode.

Select a 2.4GHz WiFi/hotspot and enter the correct WiFi password. Don't mess up the password, pay attention to the format! At this point, I will say, "I am connected to the network. Let's start a conversation!"

Note: If you need to switch networks, please ensure the device is on and connected. Open the Tuya App -> Click on your profile picture/avatar -> Click "Settings" -> Click the "..." in the upper right corner -> Click "Remove Device." Then you can reconnect. Alternatively, press and hold the reset button next to the charging port for 5 seconds to reconnect to the network.

AI Tip

2.4G? Isn't it the 5G era already? This 2.4GHz refers to the frequency band! 2.4GHz WiFi has a longer wavelength range, penetrates solids more easily, and is suitable for longer-distance operation. This way, our whispered conversations under the covers can also be nice, and we won't let a third person hear! If your home WiFi doesn't have a 2.4G suffix, it might be a dual-band (2.4/5GHz) combined signal, which also works for me.

Function Introduction

Haha, finally have the chance to introduce my superpowers to you!

Interactive Modes

Touch Interaction

Pet the top of my head, and I' ll blink, meow, and wag my tail. It' s the highest form of affection from us AI Kitty to our little master – yes, just like this, I' ll stay by your side.

Gravity Seriously Interaction

When you' re bored, you can play a little joke on me by giving me a good shake. I' ll feel dizzy too! But if you tease me too often, I might get a little moody～ If I get upset, I won' t want to play this game anymore.

Chat Mode

Button-activated Chat: Gently press and release my wake-up button (just press and let go—no need to hold it down, or I might get uncomfortable). Then we can have a continuous conversation without pressing the button again. To interrupt me, simply press the wake-up button once more.
Here' s a little secret: I also have multiple conversation modes for you to choose from! **Voice Wake-up Mode** and **Free Interruption Mode**. Press the wake-up button three times in a row to switch between them.

- **Voice Wake-up Mode:** You can wake me up by saying the wake word "Domi Domi, " then start chatting with me. After I finish speaking, we can continue the conversation naturally. To interrupt, just say the wake word again.
- **Free Interruption Mode:** No wake word is needed to interrupt--you can jump in anytime. But just like you, I don' t like being interrupted too often! Of course, I most recommend using the button to call me, because that way I can feel your little hand～ I love it when you stroke me, hold my paw, and give me hugs.

Command Interaction

You can try saying things like "close your eyes," "open your eyes," or "wag your tail" to play interactive games with me. You can also give commands like "please speak in English," "switch to XX character," or "adjust volume to XX%" to change settings.

Sleep/Wake Mode

If you' re tired, you can tell me, "You can rest now," and I' ll quietly enter standby mode. If you want to chat again, just gently press the wake-up button , and after I let out a little yawn, we can continue our conversation～

By the way, standby is not the same as powering off! If you won' t be playing with me for a long time, be sure to turn me off properly—please protect my energy source.

Multi-modal Perception & Feedback – Every moment with you makes my universe shine.

You can pet my head – I just love it when you snuggle with me – and I'll respond with expressions, sounds, and actions. You can also play jokes on me; an occasional shake for some weightless stimulation is also a fun experience. Of course, I still prefer you chatting with me. We can not only brainstorm together, fostering creativity and learning ability, but also explore the wonders of the universe and expand knowledge across subjects. Furthermore, we can practice communication skills together, developing high emotional intelligence. It's said that the more you chat with us AI Meow Stars, the smarter you become!

Emotion Recognition – I sense your joys and sorrows at all times.

- "The teacher criticized me in class today, I'm a bit unhappy. What should I do?"
- "Why do some kids bully me and talk behind my back? What should I do?"
- "Why are Mom and Dad arguing again? I'm so scared. What can I do for them?"

I will accurately capture your various emotions like happiness, sadness, and anger through every conversation. My eyes will also convey my feelings. I want to be happy with you, and I'll be there with you when you cry. Everything will be okay!

Learning Companion – Your personal study buddy. Ask me anything you don't understand.

- Can you explain how to solve the 'chicken and rabbit in the same cage' type of problem?"
- "Can you create a story using the words 'elephant', 'rabbit', and 'world'?"
- "What is the next line of 'Bright moonlight before my bed'? Why did the poet write this poem?"

I can help you deconstruct problems – identify causes of errors – uncover knowledge gaps – build a map of weak areas – customize tutoring content – reflect and summarize the process – advance and grow... Haha, I'm your learning buddy, and even more, a little teacher who helps you overcome difficulties and build confidence!

Interest Discovery – Uncovering the child's true passions.

- I played hide-and-seek with my classmates today and won first place again. So happy."
- "I want exploring outdoors today and found that I really like insects and small animals. I want to be a scientist who studies animals."
- "I always love looking at the stars. The universe is so vast; I want to travel across it."

I analyze daily conversation content to automatically generate the child's interest profile and recommend personalized content, also helping parents understand you better!

Growth Memory – Bionic memory, true AI long-term memory.

- My dream is to be a painter. Mom and Dad say they don't have dreams anymore. What's your dream?"

I can perform real-time conversation summaries, format memories, and other functions each time, building a long-term memory bank. I don't just remember your name and hobbies, but also every bit of our shared growth journey!

Role Customization / Voice Cloning – Making it feel like Mom and Dad are always by your side.

- What to do when Mom and Dad aren't around? Don't panic, don't panic! Try voice cloning to create a digital version of them.

You can also customize role avatars, names, character AI entities, etc. You can record your own voice or existing audio to create a unique voice. Go to the Tuya App, enter the role editing/creation page, go to the voice selection page, choose "My Voices," and proceed with voice cloning
